

POK INSIGHT

POK welcomes firefighters

POK® has established a special relationship with the firefighting community. They are our first product users, and we listen carefully to their needs to meet their requirements. Their experience and knowledge are a great source of information, enabling us to develop efficient and reliable products, with their safety being our uttermost priority.

It is always a great pleasure to welcome them. Recently, the Nogent-sur-Seine Fire Brigade came to visit **POK** for a "discovery tour". They came to visit our production site, view our manufacturing lines, learn about the purchasing and shipment of raw materials. They are often amazed by the complexity of our manufacturing process, from machining to the assembly line.

A visit to our product R&D department gave them the opportunity to see the office where the hand nozzles and monitors of the future are thought and designed.

If you would like to visit **POK**, please contact us by mail at: [nathalie.sejourné\[at\]pok-fire.com](mailto:nathalie.sejourné@pok-fire.com)

OK Metal new showroom

OK Metal®, is the production site for hose reels and mobile foam units.

Our visitors can now discover these products in a brand new showroom which has just been unveiled.

Other showrooms will soon be put in place this year.

Indonesia: POK tackles a new market

We are pleased to welcome in Indonesia our new partner: **PT. PRO ENGINEERING UTAMA**, based in Sentra Niaga represented by Mr. Kibtirul Arma Firmansyah, its Managing Director.

This country, made up of more than 13,500 islands, is a growing economy with a population of more than 261M inhabitants and 50% of the population is less than 30 years old.

PT. PRO ENGINEERING UTAMA has been in the firefighting and security sector over the past twenty years.

Our partner will prioritise the oil and gas industry sector, the manufacturing sector, the coal mining sector, and firefighting truck manufacturers.

There are eight large refineries in Indonesia, the biggest one being the Cilacap refinery which produces more than 350,000 barrels a day.

We are looking forward to developing a strong and long-lasting business relationship with our new partner.
