

POK

FIREFIGHTING EQUIPMENT

POK INSIGHT

We are pleased today to present to you the skills **POK** calls in.

We have many talents in fields as varied as boilermaking, machining, purchasing, quality, shipping, new product development in our Design Office, sales, etc.

At **POK**, equality between men and women is the key, and we work actively to promote it.

To meet the challenges of 2020 and to respond even better to its customers, POK is recruiting. In this way, we give men and women the chance to join a dynamic company that places a priority on quality and innovation.

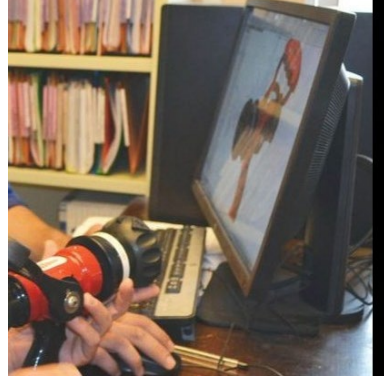

We hope to see you soon, at **POK**.

Pascal Cambournac - International Sales Director

Discover our different skills !

The design office engineers:

They take part in the design and the creation of new products

They are involved in the design and development of new products as well as the improvement of existing products until they are put on the market for sale. They collaborate with the production, purchasing and sales departments.

They are the ones who enable us to expand our product range (more than 5,000 references to date).

The CNC machine operator:

He runs an area of 4 numerically controlled machine tools to produce, by metal removal, metal parts in accordance with the dimensions provided in the manufacturing file.

All **POK** products pass through his hands.

The sales department:

The sales representatives you are in contact with advise you in identifying, analysing and formulating your expectations.

They elaborate, present and negotiate a technical, commercial and financial solution with our customers and partners in France and abroad.

The **POK** sales team enables the company to be present in France and in more than 100 countries.

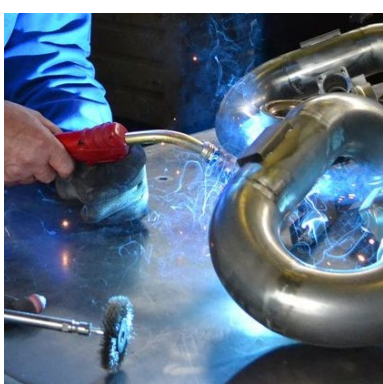

The quality department:

Our quality department staff is in contact with the various production workshops and the purchasing department.

They respect a quality control system, from the reception of raw materials to the storage of finished and delivered products.

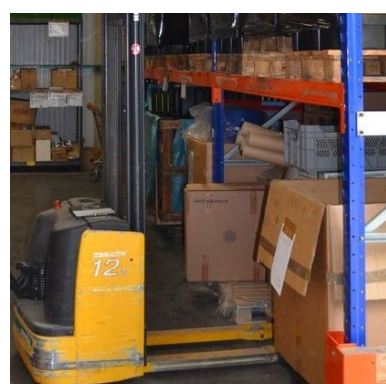

It is the quality department that enables us to offer you flawless products.

The boilermaker - welder:

He has a job, both technical and manual. He has the ability to identify the different operations to be carried out, to choose the appropriate welding processes to carry out the requested production.

He is an essential link in the manufacture of our wide range of trailers.

The shipping manager:

He is in permanent contact with the administrative and production departments of the company as well as the carriers.

It is thanks to him that our products are dispatched in France and throughout the world in optimal safety conditions.

Thanks to all these skills, we can offer you, among many other products, our "best-seller" hand nozzle, the Legende 500 LPM:

[Tecnical data](#)

[Tecnical manual](#)

Our other nozzles can be found from our online catalogue and our "Hand nozzles" product range flyer:
